

# King County DNRP Water Quality Index

STATION  WATER YEAR

GAUGE #  Newaukum USGS Gage Overall Index

King County monitors the ecological health of Newaukum Creek at station 0322, which is one mile upstream from the mouth of the creek. Water quality sampling began at the station in 1972 and continues today. The Newaukum Creek basin encompasses 17,800 acres. The creek originates east of Enumclaw Plateau and flows 14 miles before entering the Middle Green River. Land use in the basin has transitioned from historic forested lands to agriculture and now to rural residential. The creek is on the 2012 Washington Department of Ecology's 303(d) list for violation of water temperature, dissolved oxygen, fecal coliform bacteria, and copper standards. This subbasin of the Green-Duwamish watershed is considered to be a major producer of winter steelhead, coho and chinook salmon. Resident and anadromous cutthroat have been observed throughout the basin.

## Annual Water Quality Index Scores

Water quality was MODERATE based on data collected 10/1/2013 to 9/30/2014.

## Monthly Scores For Water Year 2014

Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep
64	61	63	77	36	47	73	44	87	90	81	86

## WQI Score Comparison By Water Year

## About The Water Quality Index:

The Water Quality Index (WQI) score is a unit-less number ranging from 10 to 100: the higher the number, the higher the water quality. Scores are calculated from data collected during the monthly routine sampling. For temperature, pH, fecal coliform bacteria, turbidity, and dissolved oxygen, the index expresses results relative to levels required to maintain beneficial uses according to criteria in Washington's Water Quality Standards, WAC 173-201A. For nutrient and sediment measures where there are no standard, results are expressed relative to guidelines for this eco-region. Results from the eight parameters are aggregated over time to produce a single score for each sample station. In general, stations scoring 80 and above did not fail water quality standards or guidelines and are of "low concern", scores 40 to 80 indicate "moderate concern", and water quality at stations with scores below 40 are of "high concern". For more information about the WQI please visit <http://green.kingcounty.gov/WLR/Waterres/StreamsData/WQI.aspx>
